

Submitting Your Manuscript

Manuscripts are submitted to SPE via <http://manuscripts.spe.org/ppms>

If you originally submitted your paper proposal in this system it is necessary that the same login and password are again used to access this website. If you submitted your original proposal in any other way please contact your SPE staff liaison and they will provide you with the correct access details. *Any login generated by creating a Guest Profile at this stage will not have the rights to submit a manuscript.*

The following instructions form a sequential guide to submitting your manuscript. Each section of this guide corresponds to a page in the process.

Welcome to the Paper Proposal Management System

Follow the *Submit Full Manuscript* link located at the far right of the relevant event listed in the *Author* section of this page. If this link is not present, then confirm that the correct login is being used or that the correct author is assigned to this paper.

SPE Technical Proceedings

The files and information required to upload your manuscript are listed on this page. Please be sure you have:

- All Authors (First and Last Names, Postal Addresses, Work Telephone Numbers, Email Addresses)
- Title (you can copy and paste this from your manuscript).
- Abstract (you can copy and paste this from your manuscript).
- Manuscript files in Word, WordPerfect, EPS, Text, Postscript, or RTF format.
- Figures/Images embedded in the Manuscript file or in external files in TIFF, GIF, JPG, Postscript, or EPS format.

If using TeX or LaTeX then submit the file as ASCII Postscript, with all fonts and graphics embedded.

You should also have the signed transfer of copyright forms for yourself and all other authors available for upload.

Step 1 (General Information)

The information displayed on this page is taken from the original proposal. However, this information can be updated:

- Author details can be updated by overwriting existing information in the fields.
- Information for authors not already included can either be retrieved from the SPE database by entering the first and last names into blank fields and using the *Find Person* command button, or by entering the information manually.
- Update the *Number of Authors* field at the top of the page if you need to enter additional authors.

- Use the *Author Order* drop-down box to select the correct sequence.
- Choose the author who will be making the presentation by selecting the *Presenting Author*.

Since the manuscript you wrote may differ from the proposal originally submitted, please be sure to update the abstract to match your manuscript.

The *Technical Discipline* information will be used as one of the search criteria for your paper in the OnePetro. Select the *Display List* hyperlink to open a window that displays the available categories. A minimum of one discipline must be selected from either the main or sub categories, and a maximum of five. Use of subcategories rather than main categories is preferred where they are appropriate to the subject matter of your paper.

The quantity and description of files to be uploaded for this submission can be indicated in the fields of the *Quantities* section at the bottom of this page.

At the end of the page please select either *Save and Continue* or *Cancel*.

Step 2 (Upload Files)

This page will include sections for each file indicated in the final part of Step #1, enabling you to upload each item independently.

- Use the *Browse* command button to search for the file on your local drive or network, then select the correct information for the remaining fields in that section. Repeat this process as applicable for each section in this page and use the *Submit Manuscript Files* command button to proceed.
- A window will appear advising that the files are being uploaded (depending on the amount of data being transferred and the internet bandwidth used this can take a few moments). When the documentation is received you are redirected back to the *Home Page* and the message “Manuscript Submitted Successfully” is displayed.

After you complete your upload, you will receive information about the possibility of submitting your paper for peer review. [Peer review uses a different management system, so you would need to upload your paper again, but you already have all of the information needed to do so from this submission. The process should take 10-15 minutes.] For more information about peer review and the coverage of SPE’s journals, see the Authors pages on the SPE website (<http://www.spe.org/authors/peer.php>).
