

**SPE Hydraulic Fracturing  
Technology  
Conference and Exhibition (HFTC)**

**ATTENTION: ALL 2018 HFTC Exhibitors**

**2018 NO GROWTH EXHIBIT SPACE RESTRICTION**

Due to the demand for exhibit space at HFTC a business decision was made to continue restrictions on exhibit space. SPE continues to review exhibit options while keeping the primary focus on what is best for HFTC overall and its participants.

In 2014 to accommodate the additional demand for space, the overall exhibit space expanded and includes the Town Center Foyer, representing over 15,000 net square feet of exhibit space. Because of the increased demand in exhibit space since 2014, these restrictions have been instituted hoping to provide new companies the opportunity to participate for the benefit of all attendees and participants.

Please be advised of the following restriction that will be in effect for 2018:

- Exhibiting companies will be restricted to their current square footage (space they had in 2017).
- New companies will be restricted to 100 square feet.
- In order to maintain the integrity of the HFTC Space Assignment Process, these restrictions will be uniformly enforced to all exhibitors with no exceptions permitted. Should the restrictions be lifted we will notify exhibiting companies

***SPE/HFTC appreciates your ongoing support of this premier event.  
We look forward to working with you on another successful HFTC in 2018!***
