

## MEETINGS

Save money by taking advantage of advance registration opportunities. Find complete listings of upcoming SPE conferences, workshops, and forums at [www.spe.org](http://www.spe.org).

### WORKSHOPS

- 10–11 September • Abuja, Nigeria  
• **Petroleum Reserves Estimation: Sharing the Vision**
- 13–16 September • Mumbai, India  
• **Unlocking Deepwater Potential: Strategies and Technologies**
- 16–17 September • Rio de Janeiro, Brazil • **Well Control**
- 21–22 September • Galveston, Texas, USA  
• **Offshore Intelligent Completions**
- 28 September–1 October • Edinburgh, UK  
• **SPE/SEG/AAPG Joint Workshop: 4D Seismic for Reservoir Management**
- 5–8 October • Chester, UK • **Production & Operations: Tools for Well Integrity Management**
- 11–14 October • Penang, Malaysia • **Production Enhancement—Maximising Production and Recovery in a Challenging Economic Climate**
- 12–14 October • Cairo, Egypt • **Artificial Lift Intelligence for Production Optimization**
- 19–22 October • Bali, Indonesia • **Deepwater Drilling Technology**
- 19–23 October • Guilin, Guangxi, China • **Challenges in Developing and Operating High CO<sub>2</sub> Fields**
- 25–28 October • Penang, Malaysia • **Joint Ventures—Challenges, Opportunities, and Best Practices for Win-Win Partnerships**
- 1–5 November • Beijing, China • **Ride The Wave: Building a Sustainable Energy Career During Volatile Times**
- 2–5 November • Scheveningen, The Netherlands  
• **Tight Gas**
- 9–10 November • Atyrau, Kazakhstan • **Caspian Carbonates Technology**
- 10–11 November • Galveston, Texas, USA • **History Matching: Improving Reservoir Management**

### CONFERENCES

- 8–11 September • Aberdeen, UK • **SPE Offshore Europe Oil & Gas Conference and Exhibition**
- 23–25 September • Charleston, West Virginia, USA  
• **SPE Eastern Regional Meeting**
- 4–7 October • New Orleans, Louisiana, USA  
• **SPE Annual Technical Conference and Exhibition**

### CALL FOR PAPERS

- Offshore Technology Conference**  
• Houston, Texas, USA  
**Deadline:** 1 September
- SPE Hydrocarbon Economics and Evaluation Symposium** • Dallas, Texas, USA  
**Deadline:** 8 September
- 72nd EAGE Conference & Exhibition/SPE EUROPEC 2010** • Barcelona, Spain  
**Deadline:** 28 September
- SPE International Conference on Oilfield Corrosion** • Aberdeen, UK  
**Deadline:** 30 September
- SPE International Conference on Oilfield Scale**  
• Aberdeen, UK  
**Deadline:** 30 September
- SPE/ICoTA Coiled Tubing & Well Intervention Conference & Exhibition**  
• The Woodlands, Texas, USA  
**Deadline:** 6 October

- 19–21 October • Abu Dhabi, UAE • **SPE/EAGE Reservoir Characterization and Simulation Conference & Exhibition**
- 26–28 October • Manama, Bahrain • **SPE/IADC Middle East Drilling Technology Conference & Exhibition**
- 2–4 November • San Diego, California, USA  
• **SPE International Conference on CO<sub>2</sub> Capture, Storage, and Utilization**
- 7–9 December • Doha, Qatar • **International Petroleum Technology Conference**

### FORUM SERIES

- 13–18 September • Cadiz, Spain • **CO<sub>2</sub> Capture and Storage: Can the Oil and Gas Industry Support its Development and Deployment?**
- 20–25 September • Cadiz, Spain • **The Battle to Reduce Drilling NPT: Technology, Processes and People**
- 11–16 October • Cadiz, Spain • **Getting to Robust Production Forecasts**
- 25–30 October • Dorado del Mar, Puerto Rico  
• **Operational and Technical Innovation for Field Rejuvenation**

# the evolution of TIGHT & SHALE GAS FIELD DEVELOPMENT

Use Fekete's newest software product to determine:

- The optimum number of fracs in a horizontal multi-frac well
- Optimal well density for a field
- Best location and on-stream date for wells
- The effects of infill drilling on existing wells

fast evolution  
now available.

# We Take the Heat

## Hughes Christensen Vanguard Bits

Geothermal drilling and other hot-hole applications subject drill bits to extremely high temperatures and pressures. These harsh drilling environments have always had a punishing impact on bit performance — until now. Finally, there's a drill bit that's engineered to withstand the specific challenges of high-temperature drilling: The all-new Hughes Christensen Vanguard series brings unique capabilities to these demanding applications — next-generation drilling technology you won't find anywhere else.

- High-temperature elastomer compounds provide reliable, continuous service at temperatures in excess of 500° Fahrenheit.
- Metal-sealed bearings use a metal-to-metal sealing system that delivers superior performance under the most strenuous conditions.
- Specially formulated bearing grease extends bearing life with its thermal stability and high viscosity.

Vanguard premium Tricone drill bits are customized to meet the individual requirements of each application, for performance that simply can't be beat. Only from Hughes Christensen.
