Society of Petroleum Engineers

## WHAT DOES IT TAKE TO BOOST RECOVERY RATES TENFOLD?

**IT TAKES** an unsurpassed combination of people and technology. Saudi Aramco's earth scientists and engineers are meeting the challenge to boost well productivity by taking multilateral well drilling to extreme new horizons. Wireless telemetry technology allows the number of laterals to triple. Extreme Reservoir Contact wells can boost recovery rates tenfold or even higher.

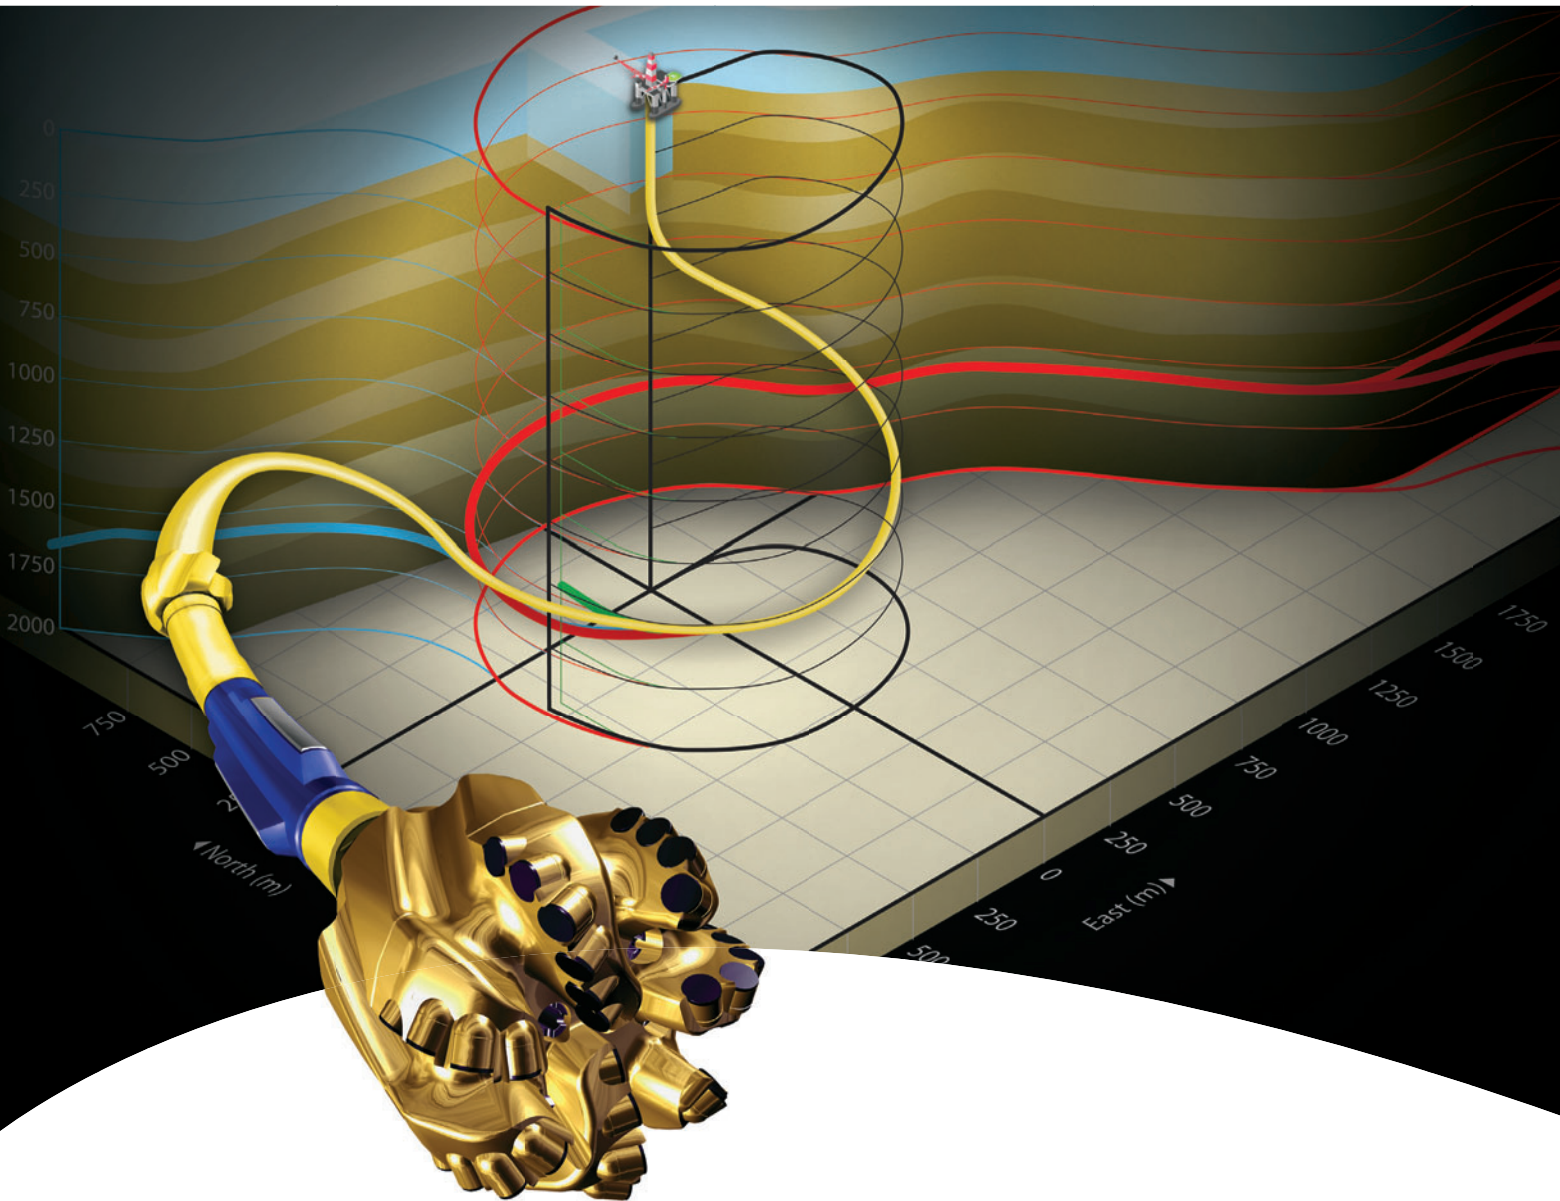

### WHAT DOES IT TAKE FOR YOU TO BE A PART OF IT?

Let's start the conversation. For more information and to apply, visit:

# Uncompromising Control

## **D** Technology

### Consistent directional control

Introducing D Technology™ directional PDC bits. In motor steerable, rotary steerable and vertical drilling applications, we're delivering unparalleled success with a total systems approach. In the North Sea, a customized BHA with D Technology bits drilled 34,000 feet during 969 circulating hours while staying within 2 feet TVD tolerance.

D Technology — Breaking records in the North Sea.
