SMITH

Four Reasons to Make Smith Services Your Source for

Tubulars and Tubular Services

Smith Services Means Superior Tubular Solutions

#1 A History of Excellence

For over 50 years the SMITH name and the Drilco® brand have been synonymous with excellence in tubular products and services. From the invention of Hevi-Wate™ drill pipe to the first use of continuous line heat treating for drill collar bars, to the comprehensive maintenance and repair facilities for BHA and down hole tools, SMITH has been continuously at the forefront of tubular sales and service.

#2 Extensive Product Range and Expertise

Smith Services offers a full range of new tubulars including drill pipe, Hevi-Wate™, drill collars and kellys to optimize your drilling operations. SMITH also provides rental of these BHA products to reduce your overall inventory costs. In addition to our expert machine shop services, SMITH provides a full range of inspection and maintenance services for your drilling tools, including our new state-of-the-art mobile field hardbanding units which extend the life of your existing equipment inventory.

#3 Global Reach

SMITH has the worldwide infrastructure to support your operations no matter where you drill. With inventory and machine shop facilities strategically located around the globe, Smith Services can be counted on to provide fast, dependable response to all your needs – 24 hours a day, 7 days a week.

#4 Unsurpassed Customer Satisfaction

In the recent EnergyPoint Research, Inc. survey of operators, SMITH was ranked #1 in Customer Satisfaction among all Integrated Service Providers. Our people are dedicated to providing you with products and services that consistently exceed your expectations.

Call your Smith Services representative today for superior tubular solutions you can trust.

A Schlumberger specialist prepares a SCAR sample carrier to run slimline single-phase reservoir fluid samplers on a drillstem test.

SPECIAL FEATURES

Vol. 60 • No. 9

- 12 Presidential Interview**
2009 SPE President Leo Roodhart outlines the goals for his term and assesses the future of SPE and the oil and gas industry.
- 24 Guest Editorial • Biases, Pressures, and Problems in Energy Price Forecasting**
John Tobin, Executive Director of the Energy Literacy Project and author of *Confessions of an Energy Price Forecaster—A 12-Step Program to Enlightenment*, explains the purpose and limitations of energy price forecasting and provides guidelines to better understand oil and gas prices.
- 44 SPE Russian Conference Preview**
A preview of the second SPE Russian Oil and Gas Technical Conference & Exhibition, to be held in October in Moscow.
- 48 Barnett Shale Showcases Tight-Gas Development**
Advances in horizontal drilling and hydraulic fracturing treatments have made the Barnett Shale formation of North Texas one of the great recent success stories in gas production and a showcase for tight-reservoir development technologies.
- 56 SPE's Forum Series**
The 2009 Eastern Hemisphere Forums include discussions on extended-reach wells, CO₂ capture and storage, drilling nonproductive time, and production forecasts.
- 58 Digital Technologies for the Next Trillion Barrels**
What are the game-changing digital technologies our industry will rely on to meet growing worldwide demand? Operators, oilfield services, and IT technology providers share their thoughts on what technologies will be used and how they will change work processes.
- 64 Management • Testing for Life**
Hatem Soliman, President of Testing Services for Schlumberger, discusses how today's complex wells require testing through every phase of the well's life cycle.
- 116 Technical and Professional Award Winners**
The winners of SPE's Annual Technical and Professional Awards, including the Anthony F. Lucas Technical Leadership Gold Medal, John Franklin Carlil Distinguished Professional Award, Distinguished Service Award, and others.
- 128 Discussion**
Readers react to June's Guest Editorial on climate change.

Drill Faster. Last Longer. Go Further.

QUANTEC

New Technology for Record-Breaking Performance

Superior durability. Superior stability. Superior drilling.

The revolutionary new Quantec premium PDC drill bits from Hughes Christensen set new standards for high-performance drilling, shattering records in challenging environments from hard granite to highly abrasive sandstone and shale. Precision depth of cut and incomparable wear resistance deliver extended operating life and accelerated rates of penetration that can save you days of rig time. Quantec — only from Hughes Christensen.

The Drill Bit Company.

TECHNOLOGY FOCUS

68 Completions Today

Damir Horvat, SPE, Engineering Manager (Drilling and Completions), Arrow Energy

Horvat

- 69 Radial-Coreflood Placement Tests
- 74 The Cement Packer: A Simple and Economic Method of Accessing Bypassed Reservoir Potential
- 78 Labyrinth Packer Lowers Costs for Steam-Injection Wells
- 80 Multiple-Layer Completions for Treatment of Multilayer Reservoirs

84 Reservoir Performance and Monitoring

Torsten Clemens, SPE, Senior Reservoir Engineering Advisor, OMV

Clemens

- 85 Monitoring the Oil Field With Live-Well Microseismics
- 88 Acoustic Surveillance of Production Impairment With Real-Time Completion Monitoring
- 94 Productivity from Eastern Nankai Trough Methane-Hydrate Reservoirs

100 Wellbore Integrity, Sand Management, and Frac Pack

Harvey E. Goodman, SPE, Chevron Fellow for Rock Mechanics and Mechanical Earth Modeling, Chevron Energy Technology Company

Goodman

- 101 Sand Management on the Lunskeye High-Gas-Rate Platform: Quantitative Risk Assessment
- 106 Near-Wellbore Modeling: Sand-Production Issues
- 112 Screenless Frac-Pack Completions: Case Studies From Jidong Field, China

New ERD World Records Set

Putting the nose
on the dog

Longest well, highest ratio

We pushed the boundaries of extended-reach drilling by 2,000 ft. Schlumberger experience, workflows, and reliable tools are redefining what's drillable. The step-out, TVD ratio plot, also known as a dog's head diagram, got a new nose thanks to an operator in Qatar and Schlumberger, who drilled the longest, highest-ratio well ever. The 40,320-ft well set 10 world records, including the highest step-out ratio of 10.485.

Welcome to productive drilling for ERD.

www.slb.com/drilling/worldrecord

The full-length SPE technical papers featured in this issue are available free to SPE members for 2 months at www.spe.org/jpt.

Schlumberger

TIRED AT THE END OF THE DAY? CONGRATS. YOU'VE ACCOMPLISHED SOMETHING.

You don't shy away from hard work; you know it's a critical ingredient to success. But your dedication and experience should count for something. At Marathon, they do. In fact, we've built the fourth largest U.S. based integrated oil and gas company on those ideals, plus honesty and integrity. Another thing that sets us apart is that we want to help you succeed—and with opportunities in the U.S. and abroad, there's plenty of room for you to shine. And because we're a fully integrated oil and gas company, we even have a stable launch pad waiting for you. Your hard work should get you somewhere, right? After all, it's your Marathon. For more information, please visit jptm.itsyourmarathon.com.

Good science makes good completions...

Direct measurements make good science.

With completion diagnostics
from ProTechnics, you've got
a winning solution.

Our direct measurements of
completion performance provide
critical insights for:

- Improving production from unconventional reservoirs
- Comparing completion designs
- Engineered completion studies
- Assessing completion performance
- Identifying missed reserves
- Calibrating frac models
- Studying EOR performance
