Fekete

Reservoir Engineering Software and Services

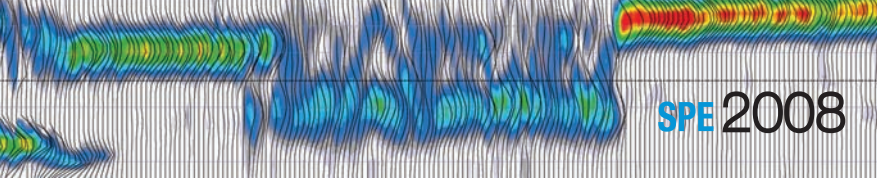

Fekete is an international consulting firm that has been providing integrated reservoir engineering services and software to the oil and gas industry for 35 years.

The strength of our expertise is the interdisciplinary co-operation between Fekete's geological, petrophysical, geophysical, and reservoir engineering staff and the integration of their results to arrive at a **practical and technically rigorous** reservoir interpretation.

We develop software that incorporates the latest in technology; it is **innovative, easy to use**, and provides **practical and advanced solutions** for reservoir engineering and production optimization projects.

Attend these 15-minute Baker Hughes technical presentations and be eligible for a

TOMTOM™

ONE 130 GPS System

Focus on the Reservoir

At the 2008 SPE Annual Technical Conference and Exhibition, Baker Hughes experts will discuss technologies and services that help operators maximize productivity from their reservoirs at the presentation theater in the Baker Hughes exhibit booth 1019.

Baker Hughes is proud to sponsor the SPE "Run-for-the-Future" 5K Fun Run/Walk Wednesday — 7:00–8:00. Proceeds from this event benefit the Gus Archie Memorial Scholarship Fund. (Separate SPE ticket purchase required.)

Monday, 22 September

The first 50 SPE attendees to present this ad at the Baker Hughes booth each day will receive a portable USB drive, and learn more about the Baker Hughes WellLink™ service — providing real-time Web access to information.

Tuesday, 23 September

And don't forget to visit our new reservoir technology companies — GeoMechanics International (Booth 1429) and Gaffney, Cline & Associates (Booth 219) while you're at the show.

Wednesday, 24 September
