Growing up in Saudi Arabia

It's a place where your kids can learn and grow ... take riding lessons, play baseball and attend some of the world's top-rated schools. Saudi Arabia is a place where they can enjoy the country's natural beauty and culture, and just enjoy being kids. Their fathers and mothers, too, can enjoy a rewarding lifestyle while helping us meet global demand for energy.

We're Saudi Aramco, a world leader in oil production and exports. Currently, about 2,000 North Americans are working with us in Saudi Arabia. And we're doing something important:

1. Saudi Aramco provides about 15 percent of U.S. crude oil imports and more than 10 percent of the worldwide demand for oil every day.
2. Those making the decision to live and work in Saudi Arabia say the professional challenges and rewards are hard to find elsewhere. And they have discovered a quality, family-oriented lifestyle to match.
3. The company's drive to continue serving the world's energy needs gives us the opportunity to work with leading-edge technologies and contribute to world-class megaprojects.
4. After 75 years of growth, Saudi Aramco is still expanding. So is the number of great career opportunities we can offer.
5. And sometimes, the kids let their parents take a turn in the saddle.

What does it take to join an industry leader?

Monitoring Mudlog Data. Saving Lives

- Objective:** Deliver superior rigsite safety and drilling efficiency using advanced surface logging service.
- Environment:** Unexpected presence of hydrogen sulfide (H₂S) gas during mud logging operation, Punjab area, Pakistan.
- Technology:** INTEQ advanced Surface Logging Service with integrated Xtract™ gas extraction and Agilent 6890 gas systems.
- Answers:** Within 51 seconds, ultra-sensitive sensors detected 1 ppm concentration of toxic H₂S gas and alerted surface logging service crew. Rig immediately evacuated and drilling operations suspended until expert assessment of situation.

Monitoring geology. Monitoring pressure. Monitoring gas.
