¹Includes crude oil, lease condensates, natural gas plant liquids, other hydrocarbons for refinery feedstocks, refinery gains, alcohol, and liquids produced from nonconventional sources.

it's about time

If the bit can get there, we can log it.

Time is money. And you can save both with ThruBit Logging Solutions. The fastest and most cost-effective logging method for multi-well development fields, our patented "thru-the-bit" logging system can save up to one-third of normal logging costs on high-volume operations. ThruBit's unique system runs through the drillstring and operates without a wireline, capturing logging data in memory as the drillstring is tripped out. This parallel operation saves time associated with logging and conditioning. So you can drill more holes and accelerate revenue streams. It's about time you increased your logging efficiency with ThruBit Logging Solutions.
