POSITIONS OPEN

MWD ENGINEERING MANAGER

General Electric Oilfield Technology is seeking an outstanding engineering manager (EM) to lead our Measure-While-Drilling (MWD) product development team in Aberdeen, UK. The EM will have experience designing MWD/LWD products and instrumentation. The ideal candidate will have a documented history of leading product development programs, from defining product specifications through creation of initial prototypes to the support of final product in the field. The EM will possess an accredited university degree in electrical engineering, physics or related discipline with a solid understanding of the design of electronics for use at high temperature (>150-deg C). Knowledge of analog & digital circuit design and DSP techniques are also prerequisites.

Qualifications

- **Electrical engineering, physics degree, or related discipline from accredited university**
- **3+ years experience designing downhole O&G exploration equipment**
- **Demonstrated success leading development programs of increasing scope and responsibility**

Interested individuals must apply electronically, following instructions at www.ge.com/careers and submitting your credentials to position 1057794.

SITUATIONS WANTED

Professionally licensed Petroleum Geologist with nearly 30 years of highly diversified and progressively responsible experience within Major and Independent operating companies and a proven track record of success, seeks a challenging role within a growing organization on a permanent or consulting basis. This candidate has world-wide exposure to the Oil Business, managerial and technical abilities, and a broad base of knowledge in many areas: reserves and reservoir analysis, mature field revitalization, EOR methods including miscible CO2 and steam injection, strategic acquisitions/divestitures, formation evaluation methods, exploration and development of conventional and unconventional reservoirs. I'm a healthy 50 years young and ready for a new start. **Code 1001**

Reservoir Engineer with over 15 years of national and international experience in oil and gas exploration, reservoir characterization, simulation, field development and reservoir management. Conventional and unconventional reservoirs. Track record of solving challenging problems and producing results that affect the bottom line, US citizen, Seeking full time domestic position, however, willing to accept contract position if it is in Houston. **Code 1000**

PETROLEUM/RESERVOIR ENGINEER: Ph.D. with over 15 years of major/independent oil company experience in all aspects of diverse upstream/research operations. Onshore, offshore, domestic and international. Computer-savvy. Team player with proven track record. US citizen. Seeking professional or management expat position in China. **Code 997**
