Complimentary Registrations	6 Registrations	4 Registrations	3 Registrations

* Provided that the print deadlines are met.

The goals of the Producer Partner Program are to:

- Showcase the contributions of oil and gas producing companies to drilling technology
- Demonstrate to the public that drilling is a high-technology endeavour
- Ensure that the technical content of the annual IADC/SPE Drilling Conference remains at the highest level
- Encourage the broadest possible attendance by keeping registration costs low.

The Producer Partner Program provides the Partner with a high profile for supporting the E&P industry's premier drilling event, the IADC/SPE Drilling Conference.

The Producer Partner Program was especially developed for oil and gas production companies. Only firms that own and operate oil and gas wells can participate, including major, independent, and national operating companies.
