EXHIBITOR PROSPECTUS

Progressing Cavity Pumps Conference

The Conference

The SPE Progressing Cavity Pumps (PCP) Conference is designed to expand attendees' knowledge of PCPs and their past applications, as well as ongoing and future developments. The technical program will address a wide assortment of PCP system applications.

Conference topics will include

- New Technologies
- Sociotechnical/HSE Concerns
- Automation, Optimization, and Monitoring
- Problem Solving and Run-Time Improvement
- Case Histories
- Challenging Applications

This conference, new for 2008, is the perfect opportunity for prospective exhibitors to meet with a focused audience of more than 200 engineers and field operations professionals who are actively engaged in the design, manufacturing, or application of PCP system equipment in downhole and surface oilfield applications.

Why exhibit?

- Meet face-to-face with your clients.
- Reach professionals interested in gaining cutting-edge information about PCP systems.
- Showcase your company's expertise.
- Introduce new technology to a knowledgeable audience.
- Acquire valuable sales contacts.

27-29 April 2008
