Editor, Forum
 Graduate student
 University of Texas at Austin

Tony Thomas
TWA Adviser
 Senior Reservoir Engineer
 Schlumberger

CALL FOR EDITORS

The Way Ahead is inviting applications for positions on its editorial board. The role involves teamwork within the editorial committee to identify interesting themes for each issue, contacting potential authors and soliciting contributions from them, editing the articles of their respective section, and making sure the work is carried out according to a deadline schedule.

Individuals who are creative, have a very good command of the English language, and who can handle the pressures of juggling their daily jobs and an exciting editorial experience are what TWA needs to further serve the oil and gas industry's young professional community.

Potential editors are required to commit to the job for at least a year. So if you are interested in being part of this dynamic and challenging editorial team that is helping shape the thoughts and ideas of the future professionals in the energy industry please send a one-page resume, including your SPE-related and other extracurricular activities that you think would add value to the team, and state the main reasons for your willingness to take on the role.

Please send your application and any questions about serving on the TWA Editorial Board to EditorTWA@spemail.org. We look forward to hearing from you.
