SPE Russian Petroleum Technology Conference
Leading Industry Event for Petroleum Professionals

11–13 October 2022 | CDP, Moscow, Russia

go.spe.org/22rptc-cfp-en

Call for Papers
Submission Deadline: 9 March 2022
Message from the Conference Co-Chairs

Dear colleagues,

For over 15 years, the SPE Russian Petroleum Technology Conference has been an important event for oil and gas professionals, scientists and engineers, executives, young professionals, representatives of oil and gas, service companies and R&D institutes gather once a year to exchange experiences and best practice, to discuss and debate as well as connect with like-minded people and colleagues.

On behalf of the Programme Committee we invite you to join this highly professional technical event and submit your abstract for inclusion in the conference programme.

Every year at the conference we strive to deliver the latest world-class relevant information. As we develop the technical programme, we take into account upcoming trends and new technologies, and are looking to attract oil and gas professionals from all over the world who will share their knowledge and experience and contribute to the highly scientific and technical level of the conference.

A significant part of the programme includes topics that have become traditional: these include field development, well construction, EOR, production stimulation, digital technologies, and modelling. New topics for the 2022 conference relate to the prospect of decarbonisation and the development of alternative energy. Distinguished industry experts will take part in topical plenary sessions and round tables.

Abstract submission guidelines and technical categories are published in the brochure and on the event website. We ask you to follow the guidelines as preference will be given to the abstracts written according to the SPE principals and standards, with a clear statement of the results and case studies.

Deadline for the abstract submission is 9 March 2022.

We are looking forward to seeing you at the 2022 conference!

Irina Bobb
GeoExpert Service

Wang Jun
SINOPEC, Russia and Central Asia

Technical Categories

Visit go.spe.org/22rptc-cfp-en to access the complete technical categories list and submission guidelines.

- Hard-to-Recover Reserves
- Enhanced Oil Recovery
- Well Construction – Drilling and Completion
- Oil and Gas Production - Equipment and Technologies, Production Gathering and Processing
- Well and Formation Testing, Formation Fluids Sampling and Evaluation
- Oilfield and Gas-Oil Field Development
- Digital Technologies for Oil and Gas Industry
- Static, Dynamic and Integrated Modelling
- Geomechanics
- Conceptual Engineering and Re-Engineering
- Gas, Gas Condensate and Oil Gas Condensate Field Development
- Core Analysis
- Field Geology and Geophysics
- HSE
- Decarbonization
- Hydrogen Industry and Renewable Energy Sources
- Well Logging
- Conventional Fracturing and Stimulation

2021 Conference in Numbers

- 550+ delegates from 16 countries
- 150+ international and national oil and gas companies
- 230+ technical presentations
- 45+ plenary, keynote, technical and ePoster sessions from senior executives and industry leaders
- 4 days of extensive networking opportunities
- SPE Regional Awards Ceremony
- SPE Regional Student Paper Contest
- 94% of attendees would recommend this conference to their peers
- 92% of attendees highly rated the technical content
