SPE International Conference and Exhibition on

FORMATION DAMAGE CONTROL

21–23 February 2024
DoubleTree by Hilton Hotel Lafayette
Lafayette, Louisiana, USA
go.spe.org/Preview2024FD
Dear Colleagues,

The one aspect of the petroleum industry that has remained constant during decades of its pendulum existence has been the desire to optimize oil and gas production with minimum cost.

The SPE International Conference and Exhibition on Formation Damage Control is an excellent venue to share your expertise, experience, and knowledge with your colleagues around the world. Contribute to the exchange of ideas via technical and poster sessions, exhibitor presentations, panel discussions, and continuing education courses.

We hope to see you in Lafayette, Louisiana next February during the festive Mardi Gras season.

Ali Ghalambor  
Chairperson  
Oil Center Research International
About the Conference

The SPE International Conference and Exhibition on Formation Damage Control will cover the range of challenges and remedies for all things related to the identification, prevention, and remediation of formation damage.

Who Attends

- Professionals in drilling, completions, production and operations
- Professionals in reservoir description and dynamics
- Engineers, managers, and executives
- Diverse representation from the US, UK/Europe, China, Middle East, and Latin America

Feedback from Past Attendees

“Always has a good collection of papers with practical applicability.”

“It is an excellent conference with highly relevant topics.”

“Key personnel from both service companies and operators can meet up and discuss matters related to formation damage control under one roof.”
