## About the Society of Petroleum Engineers

The Society of Petroleum Engineers (SPE) is a not-for-profit professional association whose more than 168,000 members in 144 countries are engaged in oil and gas exploration and production. SPE is a key resource for technical knowledge providing publications, events, training courses, and online resources at [www.spe.org](http://www.spe.org).

Income from this event will be invested back into SPE to support many other Society programs. When you attend an SPE event, you help provide even more opportunities for industry professionals to enhance their technical and professional competence. Scholarships, certification, the Distinguished Lecturer program, and SPE's energy education program Energy4me are just a few examples of programs that are supported by SPE.

## Dear Colleagues,

On behalf of the program committee, we invite you to join us for the **SPE Artificial Lift Conference and Exhibition—North America** in The Woodlands, Texas from 25–27 October 2016.

The goal of this conference is to capture new information, and to bring together the brightest professionals in North America to establish a record of artificial lift applications relevant for unconventional shale developments. This knowledge will be made available globally to industry professionals via OnePetro, the multi-society library of technical documents serving the E&P industry.

Sessions will be dedicated to:

- Sucker rod pump
- Electric submersible pump
- Gas lift
- Gas well deliquification technology

There will also be sessions bringing attendees together to examine common topics such as artificial lift selection, optimization, and failure tracking and analysis. Plenary sessions will feature panel speakers on a variety of topics such as the impacts of unconventional shale drilling and completions practices on artificial lift and what long term issues exist that we have yet to face regarding artificial lift for these unique reservoir developments.

Save the date and start making plans to attend this exciting event! We look forward to seeing you in October.

Sincerely,

**Shauna Noonan**  
Program Chair  
Occidental Petroleum

## About the SPE Artificial Lift Conference and Exhibition—North America

This event will bring together the North American artificial lift community and will focus on documenting excellent learning, case studies, and best practices in artificial lift applications, primarily for unconventional shale developments.

Registration for this conference is now available.  
Visit [www.spe.org/go/WelcomeALCE](http://www.spe.org/go/WelcomeALCE) to learn more.

We will continue to send you more information about the SPE Artificial Lift Conference and Exhibition—North America in the coming weeks, so keep an eye on your mailbox.
