

Annual Technical Conference and Exhibition

24–26 September 2018
Dallas, Texas, USA
Kay Bailey Hutchison Convention Center

Whazzup in Drilling?

Jeff Moss
Drilling Technical Director
ExxonMobil Upstream Research

Needs & Challenges

Sustainable Efficiencies

- People - Training / Automation
- Operational Practices - Implementing understanding of physics
- Supply Chain – Reassess contracting strategies

Reducing Uncertainty

- PPG/Frac Gradient
- Target Definition
- When is “good enough” good enough

Current Trends

Automation (Equipment / Workflows / Decision Making)

Enhanced Pad Rigs

(7500#, Walking, AC, with a cherry on top...)

Deepwater Rig Utilization

Data & Information Questions

- Cloud vs Fog – When & Where to process data
- Degree of Optimization
- Data Quality & Ownership

Needs & Plans

- Increasing SPE's usefulness to the drilling community
 - Strengthening relationships with sister societies
 - Better access to more timely information
- Topics & Events
- ?'s

Annual Technical Conference and Exhibition

24–26 September 2018
