

Change Log:

Guidelines for Application of the Petroleum Resources Management System

Last Updated: 12/4/2024

This is a public record of submitted revisions, edits, errors, and additions since the current published errata (2024) and published edition (2022).

These submissions are collected regularly and will be evaluated by the Oil and Gas Reserves Committee (OGRC) for inclusion in the next published version.

New editions are published and distributed by the Society of Petroleum Engineers approximately every 5 years with a complete update approximately every 10 years.

Submitted 11/18/2024:

1. Update to Table 10 in Chapter 4, "Assessment of Petroleum Resources Using Deterministic Procedures." The values for Case 1P were incorrect. The updated Table is included below.

Case	Reserves*	EUR
1P	2,537	18,274
2P	4,371	20,108
3P	4,423	20,160
* Reserves to 1 BOPD Economic Limit		
Actual Cum. Production =		15,737 STB
